AG ASSESSMENT

You are given the folder with many sub-folders.

Parent folder
—-15215 (child folder with post id as name)
—------pictures… (jpg files)
—------info.txt (format looks like this:
{"productId":"15838771","priceUSD":"130","totalFloors":"2","floor":
"1","bedrooms":3,"rooms":5,"area":"86.70 m²"," address": "15 Pekini street", "propertyType":
"0", "agreementType": "0", "description": "Lorem ipsum", "vipStatus": "0", "realEstateType": "0"
}

You have to go to this page:
https://statements.tnet.ge/ka/statement/create?referrer=myhome and populate data that's in
the child folder. Fill in the fields with info.txt and upload all the pictures.

Acceptance criterias:

1. I, as a web scraper user, should be able to input flat type(1) somewhere in the code,
   transaction type(2), construction status (3), and paid services (4) which must be
   optional, so scrapper shouldn't choose any if it is not provided. All the fields
   mentioned will be provided as index numbers. E.g 0 for flat type will mean first flat
   type in options etc…
2. Location field should be filled and then the first option from the dropdown should be
   chosen.
3. Scraper should loop through all folders in the parent folder and publish (NOT AS
   DRAFT) all the posts.
4. All the required fields that aren't provided in info.txt which you come across on the
   website should come from the env file.
5. SCRAPER MUST WORK PROPERLY WITH ANY CORRECT PARAMETERS (type -
   number) PROVIDED WHICH ARE MENTIONED IN POINT 1.

Account credentials that will be used for testing:
email: merabitaturashvili@gmail.com
Password: iphone6
Phone number: 574074289

ZIP of the sample parent folder will be provided. You should work with that folder as a
sample
